

## What is TRAPPED SOULz?

### **A blockchain-protected "spell" to trade moral debts.**

In a creative occult-related and game-like way.

Someone has hurt you, let you down, betrayed you, trolled, offended, fooled, insulted you? But you cannot punish him/her in real social world or reach him out? And you cannot let it go? You feel bad, really bad, you're full of resentment, bitterness, those feelings destroy yourself.

Not fair!

Trap offender's soul and make him suffer! Trade his **TRAPPED SOUL** to others or redirect any of your own negative emotion, energy and misfortune onto it. Become free and happy!

Your offenders are your funds!

### **What is a SOUL #xxxxxxxx token?**

A **SOUL #xxxxxxxx token** is a container holding one or more **TRAPPED SOULz** as depersonalized representation of moral debtors or offenders, created and minted on opensea.io or similar NFT-creation platform. It has a unique visual image and a 9-symbol code. There may exist only 9 **SOUL #xxxxxxxx tokens** of similar style using one **SOULz TRAP** model. A new owner of a token may add only one human offender name to it before the token changes owner - is sold, gifted or destroyed. A new owner may hold and trade a token without adding anyone new to **SOUL #xxxxxxxx** .

### **Why buy SOUL #xxxxxxxx token?**

When you hold somebody's **TRAPPED SOULz** in a **SOUL #xxxxxxxx token**, your negative feelings, emotions, energy and misfortune are transferred onto those other people trapped inside, whom you may not even know; they receive it fairly, proportional to the moral debts they have and to sufferings they have caused to others. Karma is in balance.

You may trap your own offender into the token you hold, too, and then trade it further or keep for your pleasure. You can print it out, hang on the wall and throw darts of bad mood there etc.

### **Why sell SOUL #xxxxxxxx token?**

Best way to let it go if you have trapped a new bad guy into the item. Raise funds instead of feeling hurt!

### **How else to use and trade TRAPPED SOULz?**

Actually any way your fantasy is capable of - as a collector, occultist or experimenter! Maybe you dwell among witches and need to protect yourself? Maybe you need good nutrition for a dragon you hide on the attic? Or maybe you are a very bad guy and wish to transfer negative karma of your own moral debts onto others? Or maybe you're looking for the **SOUL #xxxxxxxx token** where once you were trapped by someone to burn it? Or you're curious about easter-eggs to collectors of all 9 items from same **SOULz TRAP** model? Or maybe you need to give a nice deathday gift to your demonic room-mate? Or you're just curious how it works? Or you like to invest in weird projects? or...?

### **How to use traps?**

**SOULz TRAP** models are created by our very special and odd team. Each trap model will be minted as 9 unique items of similar style - **SOUL #xxxxxxxx tokens**. To create a new item we place the first real **TRAPPED SOUL** inside the container and say some spells and wave those magic-wands-you-know and throw some rainbow explosives in open fire and many other regular magic things. Main **SOULz Master** at the same time makes her irregular magic in some graphic application. Once 9 items of one trap model

are ready, we mint them, you buy one. Once you own a new **SOUL #xxxxxxx token**, you can take a piece of paper, write your offender's name on one side, the token's unique code on the other, imagine that person as clearly as you can, and the bad situation, say many rude words to this piece of paper, as many and as dirty as you can, and then burn this paper. Your offender will be trapped in the **SOUL #xxxxxxx token**.

**Forever?**

Unless somebody releases **TRAPPED SOULz** by destroying the NFT.

**Can I trap a really bad guy, who has never done harm to me directly, but I know he's bad and I don't like him.**

No, **SOULz TRAP** works on a person who has hurt or offended you personally. If you try to trap an innocent person or the one who has no moral debt before you, you'll be trapped instead, oops.

**Can I trap several people at a time with one SOUL #xxxxxxx item?**

No, you can't. You can add only one name to the exact item before it changes owner. But if once you've sold/gifted the item, and by occasion you purchase the same item back later, you can add another name.

**Can several people trap the same bad guy in different SOUL #xxxxxxx tokens?**

Sure, they can. This guy will hold the burden of several traps, poor he.

**Can I use the SOUL #xxxxxxx code from the image without owning the NFT?**

You'll be trapped instead, oops again.

***Try it? Play TRAPPED SOULz with us. Where no place for mercy, assist carma!***
